In Outer
Space

Hey Builders Club Members!

WOW — imagine 3,000 LEGO Club members gathered under one roof! That's exactly what happened during the Grand Opening celebration of the LEGO Invention Adventure at the Museum of Science in Boston, Massachusetts.

At a special members-only reception, these lucky LEGO Maniacs learned all about the awesome new "hands-on" LEGO exhibit. They also got to meet LEGO Designers Francie

Berger, Allen Demers, Stephen Found, and Dave Gold.

"It was great talking with club members. The kids really loved the exhibit. It was a really cool day!"
Allen

The LEGO Invention Adventure will be traveling across the country through 1997...Maybe it will visit a museum near you!

In the meantime...keep on building dudes!

Moving?

If your moving, please send your club mailing label along with your new address to: LEGO Builders Club, P.O. Box 5000, Unionville, CT 06087

Rocket

On July 20, 1969, Neil Armstrong walked on the moon. To help celebrate 25 years of moon exploration, LEGO's Travel in Space World Show has landed at Space Center Houston...a space museum at NASA's Johnson Space Center.

Imagine leaving the earth behind as you blast off in a rocket-powered 163,170 lb. shuttle that reaches a speed of 3,100 mph just minutes after lift off!

To create your own space adventures, start with some basic facts, add your imagination, and build your own LEGO space worlds!

In the future, robots could do other tasks that are too simple or possibly dangerous for humans to complete.

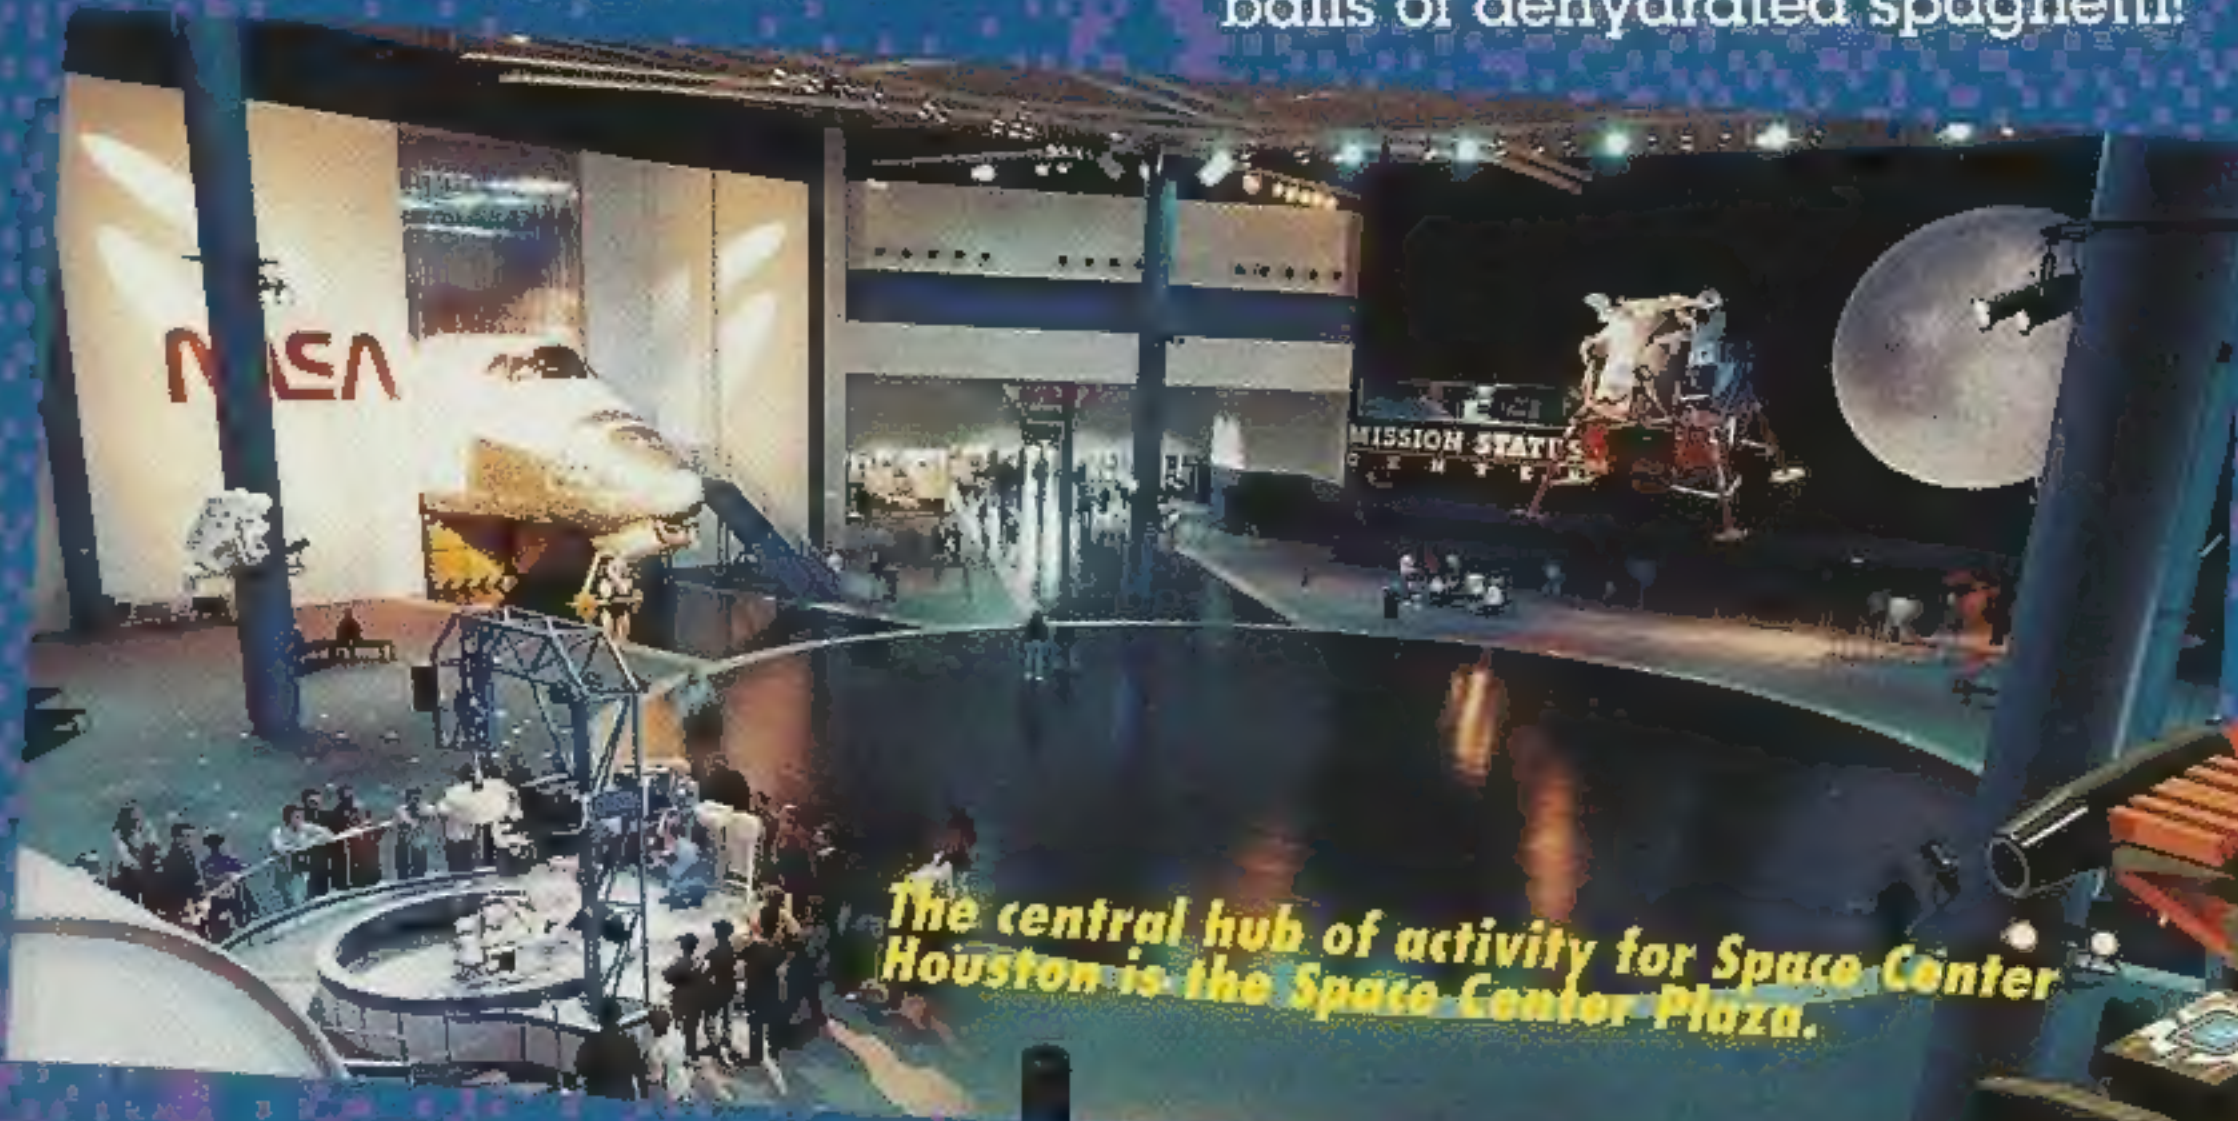

To The Moon!

Would you like to live on the moon now? Although it has mountains, valleys, and seas (dried lava flows), there is no water or atmosphere. The temperature ranges from

You can eat 100 different kinds of Earth food, except they come dried, or frozen before cooking. Food floats in space, so think of the fun you could have gobbling up floating balls of dehydrated spaghetti!

People would be joined in space by robots. Robotic landers and probes now collect valuable information about space.

Now that you know some basic space stuff, use your imagination to create a fantastic space adventure!

The central hub of activity for Space Center Houston is the Space Center Plaza.

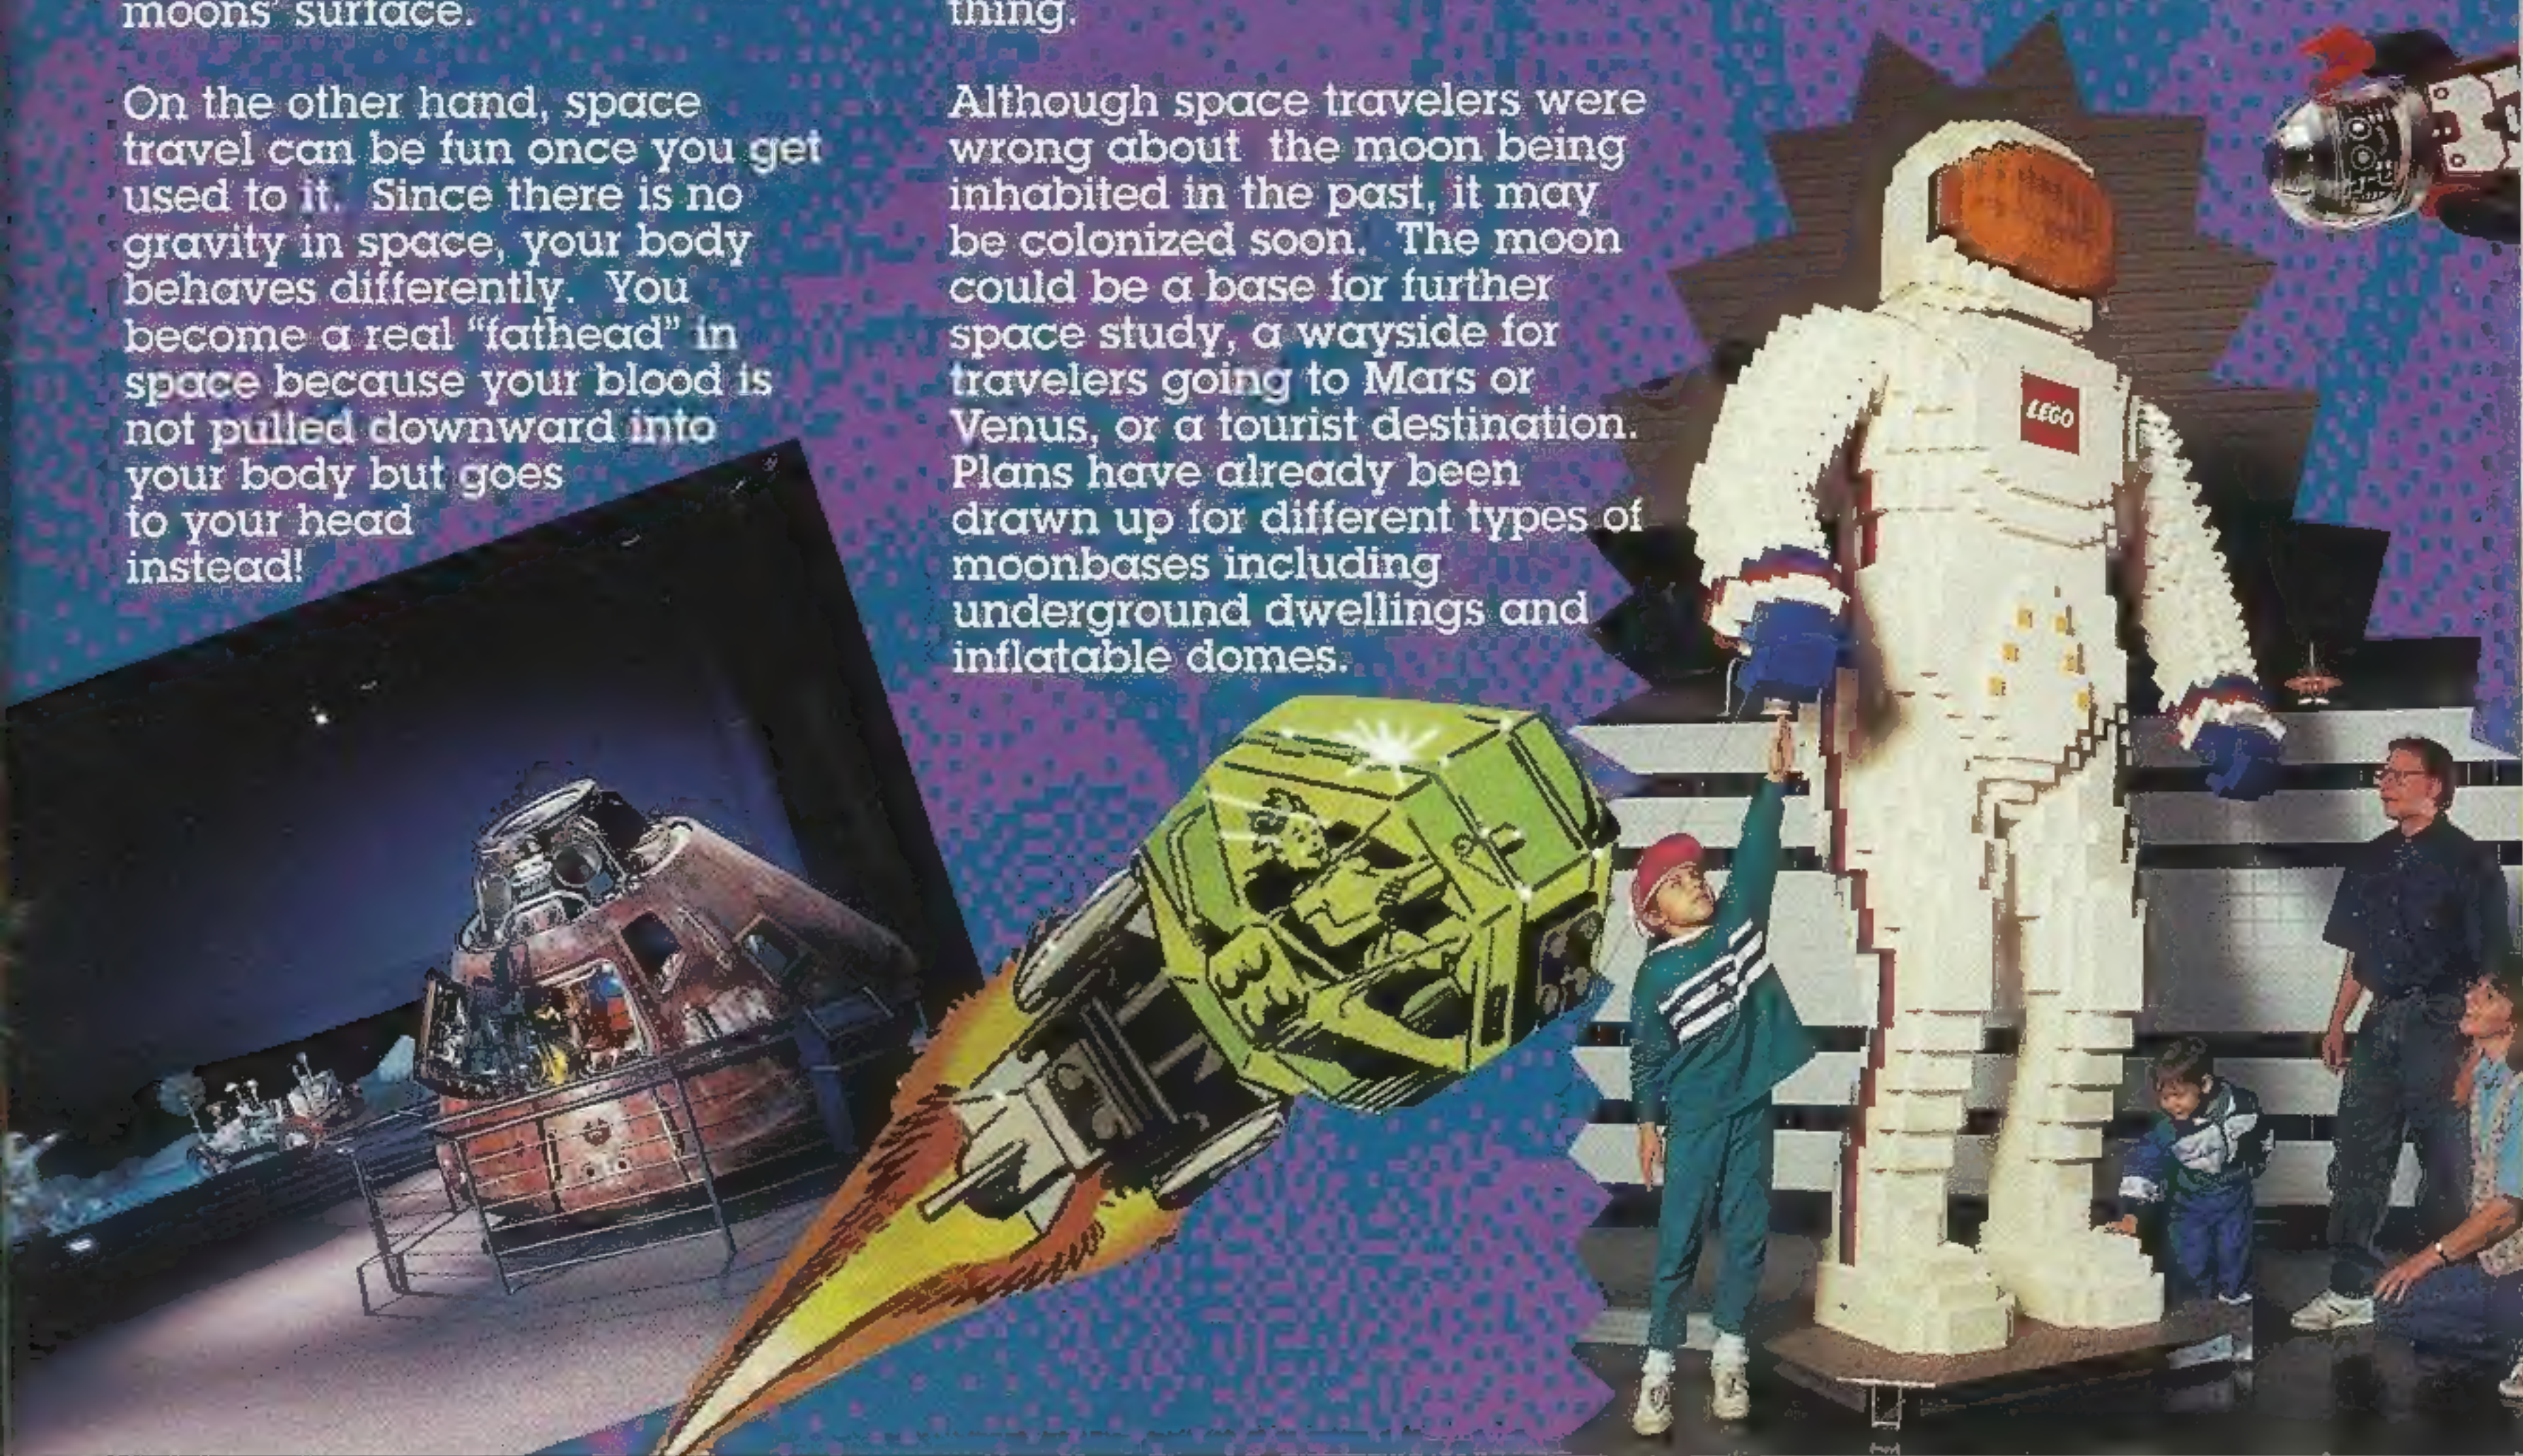

273°F to -244°F. It is covered in gray/brown dust, and Neil Armstrong's footprints will remain visible until a meteor blasts them away. Craters from meteor crashes cover the moon's surface.

On the other hand, space travel can be fun once you get used to it. Since there is no gravity in space, your body behaves differently. You become a real "fathead" in space because your blood is not pulled downward into your body but goes to your head instead!

To sleep, just attach your sleeping bag to a wall and strap yourself in. Otherwise, you'll float around, and wake up when you bump into something.

Although space travelers were wrong about the moon being inhabited in the past, it may be colonized soon. The moon could be a base for further space study, a wayside for travelers going to Mars or Venus, or a tourist destination. Plans have already been drawn up for different types of moonbases including underground dwellings and inflatable domes.

This 11-foot-tall astronaut towers over the exhibits in the LEGO "Travel in Space World Show". The astronaut represents the triumph of man's giant leap into the universe.

"UTAHRAPTOR DINOSAUR"

It has a hinged jaw and swinging tail legs that move back and forth. Also hinged hands and it can actually eat people.

Kreigh Bourff, Age 7
St. Louis, MO

"LAP TOP COMPUTER"

YOU BUILD IT!

Swinging On A Star!

Here's a most original model that was created by club member Jessica Manning from Pittsburgh, Pennsylvania. The twelve-year-old LEGO Maniac calls her design "Would You Like to Swing on a Star."

Jessica explains, "I got the idea from my dad, who sings that song. I built it out of regular bricks and some LEGO TECHNIC blocks. The man seated on the swing — which really does swing — is named Al."

ISLANDER MASK

Using this design, make an intriguing Islander mask to wear for Halloween, for parties or for just scaring your sister or brother.

Connect the dots to complete the mask!

CALLING ALL BUILDERS:
Send in your original model-making instructions... And maybe the LEGO Model Designers will feature YOUR design in BRICK KICKS!
LEGO Builders Club, "You Build It" P.O. Box 1308
Enfield, CT 06083. Club members featured in "You Build It" will receive a free LEGO set of their choice.
Winners will be notified by mail.
LEGO Systems, Inc. will only send to each winner a LEGO building set which is properly age-graded for the recipient.

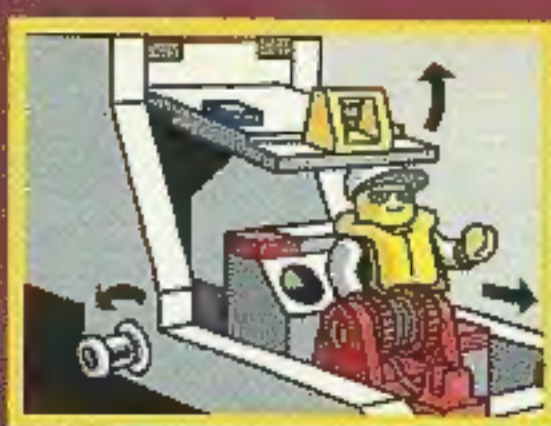

TAKE A HOT ROD TOUR TO SEE THE LATEST RESCUE TEAM!

Try to keep up with the Maniac as he follows
the fast-paced Rescue Team!

Possibilities

6348 Surveillance Squad:
With their high tech
equipment, these cops can
hear a crook sneeze a mile
away! The tough truck
also includes a cycle for
high speed chases.

6483 Coastal Patrol:
With lights flashing and siren
wailing, the Coastal Patrol comes
to the rescue! The working winch
really reels 'em in.

6571 Flame Fighters:
By truck or copter, these
fearless firefighters fight
fiery flames! The fire
engine's compartments open
to store firefighting gear.

Check out
these way cool
Rescue sets!
